

REMARKS

This Amendment after Allowance is being filed to correct informalities that were introduced into the claims by way of the Examiner's Amendment, as well as to correct an informality noted upon further review of the claims. In particular, it is noted that in claim 1, line 8, the original term "wherein" was inadvertently typed out as "where". Furthermore, in claim 10, the original language of the configuration of the self-cleaning transmittable plate was inadvertently typed out as having a "concave" portion and a bracelet-shaped "concave" lenses. The "concave" terms should have been, and were originally typed out as "convex". This Amendment corrects these informalities. Moreover, in claims 1, 4, 7, 10 and 19-22 it is noted that the transmittable plate is used for self-cleaning the projection lens. However, the recitation within these claims could be implied as indicating that the transmittable plate cleans itself, due to the recitation of the "self-cleaning transmittable plate". Applicants have thus changed the term "self-cleaning transmittable plate" to "transmittable plate for self-cleaning", in order to alleviate any confusion as to the interpretation of these claims. It is believed that no further search and/or consideration is required on the part of the Examiner because of these changes, since the intent and scope of the claims remains the same. Entry of this Amendment is respectfully requested.

Respectfully submitted,
